

P/N: 21001

The highest-quality RGBW Controller to be fully integrable with Home Automation Systems. Addressable up to 8 zones while using only one communication port. High power ratings mean you can use one of these controllers where you would need multiple smaller controllers. This controller was developed with integrators in mind for simple ASCII commands that can be programmed in no time.

Specifications

Input Power, Connector	DC 12 ~ 24V, Phoenix Connector
Output Power, Connector	480W total, 120W per channel, Phoenix Connector
Operating Temp.	-20°C ~ 85°C
Operating Humidity	5 ~ 95% RH
Communication Standard	StellarSkySystem/RJ45, RS232/Phoenix Connector
Size	129mm x 100mm x 35mm
